

OBTAIN REAL-TIME INFORMATION FROM ANY SMARTPHONE PLATFORM.

VIEW PROOF OF DELIVERY.

VIEW SHIPMENT DETAILS SUCH AS FLIGHT STATUS.

## Shipment Information at Your Fingertips.

You can place an order and get the information you need on your critical shipments from wherever you are, simply by using the QuickOnline Mobile App, a complement to our industry-leading QuickOnline web portal. Real-time information status updates can be accessed, with the ability to drill down to specific details such as package contents and dimensions, special instructions, flight status, transit time, proof of delivery, and more.

If you have a question, or need immediate assistance, you can use our Auto Dialer feature, which connects you directly to the specific Control Tower that is handling your shipment.

- > Place a new order from anywhere using your QuickOnline address book.
- > Get real-time information on your shipment, review current shipments in transit or shipment details up until 18 hours after proof of delivery.
- > View shipment details such as package contents and dimensions, collection details, special instructions, flight status, transit time, status history and proof of delivery.
- > Query any shipment, regardless of how much time has passed, by entering a tracking number.
- > Customize your push notifications for all shipment alerts.
- > Use Auto Dialer feature which connects you to the Control Tower handling your shipment.
- > Other capabilities and features make use of GPS, Bar Code Scanning, Photos and Maps.

Download the QuickOnline Mobile App FREE on iTunes App Store or Google Play App Store.
